PROJECT 1-2

My project is on Friend's Networking. In this project I make such a profile by which we can see the relation between friends. That means if we want to see the relation between two friends, we just input their names and we get the different paths by which they are friend. Without that by this project we can see someone's full friendlist , we also add friends and remove friends from their list. We also make friendship among the person in the list.

INPUT :
Amit
Fahad
Tanmoy
Rima
Muna
Abir

MAKE FRIENDSHIP :
Amit with Fahad

Fahad with Tanmoy

Rima with Amit

Muna with Tanmoy

Muna with Rima

Abir with Rima

Abir with Amit

INPUT :

Search
Amit Tanmoy

OUTPUT :
Connection 1: Tanmoy > Fahad > Amit

Connection 2: Tanmoy > Muna > Rima > Amit

Connection 3: Tanmoy > Muna > Rima > Abir > Amit
